

## About ConnexALL®

ConnexALL® breaks the barriers of proprietary interfaces, it provides a single point of management for ALL business systems which need to communicate events and status to many different devices.

ConnexALL® seamlessly integrates proprietary event-based business systems to an ever-expanding list of third-party notification technologies.

If "something happens" and "someone needs to know about it" ConnexALL® is the communications bridge that can intelligently bring the two together.

ConnexALL® is a standards-driven, modular based software engine. It integrates a wide range of communication resources to any business systems. The ability to receive real-time notifications and text messages anywhere in the world gives organizations the competitive edge in decision-making process.

## Patient Monitoring Integration

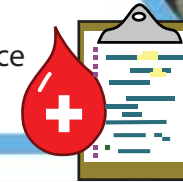

### MONITORING PATIENT STATUS

- Real-time status updates sent to any predetermined centralized location or mobile device
- Send alerts to any device: email, pagers, monitors, wallboards and paging systems
- Waveforms and diagnostics sent to any communication device for immediate assessment and action
- One-touch update for staff from any location

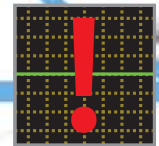

### MANAGING AND REPORTING

- Streamlined scheduling of resource allocation based on trends
- Access systems remotely using secure web-based or mobile communications
- Easily assign different zones to specific primary and back-up healthcare staff on the fly or create assignment plans for automatic schedule activation
- Track individual or facility response performance

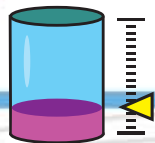

### DISPATCHING EVENTS

- Attending nurse can monitor the status of every patient
- Nurses can manually trigger events on virtual call-point or status on their touch-screen monitors, including sending messages to the appropriate caregivers
- Predefined messages can be sent out to a variety of devices at predetermined times

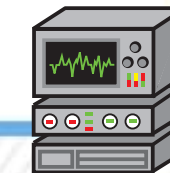

### REQUESTING ACKNOWLEDGEMENT

- Automatically or manually escalate alerts if personnel don't acknowledge receipt of an alert message or are busy
- Option to cancel low priority events
- One-touch call-back to request more information
- Update central whiteboard information in real-time

### PATIENT TRACKING

- Follow patient status and response progression in real-time
- Map patient location using RFID or GPS
- Accurately update families waiting for progress reports

ConnexALL® links Monitoring systems to BlackBerry and any other communication devices delivering text and waveforms as part of the notification sequence.

### Benefits:

- Maximize patient monitoring efficiency
- Single-touch automated service / supply requests
- Improve patient monitoring communication
- Real-time patient monitoring status displays
- Reduce wires and installation of electro-magnetic devices by using virtual push
- ConnexALL® leverages existing facility infrastructure
