

About ConnexALL®

ConnexALL® breaks the barriers of proprietary interfaces, it provides a single point of management for ALL business systems which need to communicate events and status to many different devices.

ConnexALL® seamlessly integrates proprietary event-based business systems to an ever-expanding list of third-party notification technologies.

If "something happens" and "someone needs to know about it" ConnexALL® is the communications bridge that can intelligently bring the two together.

ConnexALL® is a standards-driven, modular based software engine. It integrates a wide range of communication resources to any business systems. The ability to receive real-time notifications and text messages anywhere in the world gives organizations the competitive edge in decision-making process.

CONNEXALL®

Patient Transport Management

IMPROVING PATIENT TRANSPORT TIMES

- Real-time request updates sent to any predetermined centralized location or mobile device
- One-touch transport request from any location, without waiting on hold or tracking down appropriate resources
- One-touch service requests, such as elevator call, from remote locations
- Real time status updates
- Automatic delay notification

PATIENT TRACKING

- Follow patient status and response progression in real-time
- Map patient location using RFID or GPS
- Accurately update families waiting for progress reports

DISPATCHING EVENTS

- Attending dispatcher can monitor the status of every transport request
- Predefined messages can be sent out to a variety of devices at predetermined times
- Easily assign different zones to specific staff on the fly or create assignment plans for automatic schedule activation

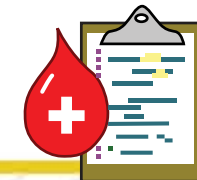

REQUESTING ACKNOWLEDGEMENT

- Automatically or manually escalate alerts if personnel don't acknowledge receipt of an alert message or are busy
- Option to cancel low priority events
- One-touch alert capability for emergency response staff along with message receipt confirmation
- One-touch call-back to request more information
- Update central whiteboard information in real-time

MANAGING AND REPORTING

- Streamlined scheduling based on trends
- Track individual or facility response performance
- Identify transportation bottlenecks
- Access systems remotely using secure web-based or mobile communications

ConnexALL® is a highly flexible and scalable integration system, easy to configure, provides an intuitive user interface and includes extensive management reporting.

Benefits:

- Maximize patient transport efficiency
- Single-touch automated service / supply requests
- Improve staff communications
- Real-time patient transport request displays
- ConnexALL® leverages existing facility infrastructure
