

About ConnexALL®

ConnexALL® breaks the barriers of proprietary interfaces, it provides a single point of management for ALL business systems which need to communicate events and status to many different devices.

ConnexALL® seamlessly integrates proprietary event-based business systems to an ever-expanding list of third-party notification technologies.

If "something happens" and "someone needs to know about it" ConnexALL® is the communications bridge that can intelligently bring the two together.

ConnexALL® is a standards-driven, modular based software engine. It integrates a wide range of communication resources to any business systems. The ability to receive real-time notifications and text messages anywhere in the world gives organizations the competitive edge in decision-making process.

CONNEXALL®

Property Maintenance Management

IMPROVING RESPONSE TIMES

- Monitor building from any predetermined centralized location or mobile device
- One-touch maintenance requests from mobile locations
- Assess and action requests in real-time with automatic delay notification
- Remotely restart your systems in the event of an error
- Calculate and project when your systems will need maintenance
- Integrate private and public notification systems

EVENT UPDATES

- Follow event status and response progression in real-time
- Map event area or staff location using RFID or GPS
- Allow clients secure access to event progress information online or through any mobile device
- Predefined messages can be sent out to a variety of devices at predetermined times
- Notify managers or facility services based on type of events

MANAGING AND REPORTING

- Streamline staff scheduling based on trend reports
- Track individual or facility response performance
- Easily assign different zones to specific staff on the fly or create assignment plans for automatic schedule activation
- Inform maintenance personnel of needed parts before they arrive at on-site problems
- Grant temporary or permanent access to specific systems and locations
- Know which components have unacceptable levels of hardware issues

REQUESTING ACKNOWLEDGEMENT

- Automatically or manually escalate alerts if personnel don't acknowledge receipt of an alert message or are busy
- Option to cancel low priority events
- One-touch alert capability for emergency response staff along with message receipt confirmation

ConnexALL® is a highly flexible and scalable integration system, easy to configure, provides an intuitive user interface and includes extensive management reporting.

Benefits:

- Maximize property management services
- Extend asset life by running at optimal parameters
- Minimize service interruptions
- Decrease equipment downtime
- Real-time event displays
- ConnexALL® leverages existing facility infrastructure
